

Yardage Chart

The Block Maker II For Half-Rectangle Triangles

“Grid” refers to the number of blocks per row x number of blocks per column

The yardage for quilt settings and sashings are listed separately because many blocks in the book are shown in quilt settings with different sashings in each. Also, at the end of this yardage chart you will find a few things that were accidentally left out, such as the modified pinwheel block as cornerstones. All sizes stated are finished.

Omissions!

As I went through the book for the yardage chart I discovered some sashings that were mistakenly forgotten.

Roselle Sashing

2 1/2" x 7 1/2" Not Available

3" x 10" finished Small HRTs Cut 1 3/4" x 3 1/2" & trim to 1 1/4" x 2", middle rectangle cut 2" x 4 1/2" and outer rectangles cut 1 1/4" x 4 1/2".

Vanessa Sashing

1 1/2" x 9" finished HRTs cut 1 3/4" x 3 1/2" & trim to 1 1/4" x 2", middle rectangle cut 2 1/2" x 3 1/2".

2" x 12" finished HRTs cut 2" x 4" & trim to 1 1/2" x 2 1/2", middle rectangle cut 2 1/2" x 3 1/2".

2 1/2" x 15" finished HRTs cut 2 1/4" x 4 1/2" & trim to 1 3/4" x 3", middle rectangle cut 3" x 5 1/2".

Cornerstones

Cornerstones are easy to figure and I thought rather than just giving you the numbers, it would be better to show you how.

Solid fabric cornerstones: Finished width of sashing + $1/2$ " (seam allowance all around) = cutting size of cornerstones

Example: Sashing is 1" wide + $1/2$ " = $1\ 1/2$ " which is the cutting size of the squares

Four Patch cornerstones: Finished wide of sashing divided by 2 = finished size of each square. Add $1/2$ " for the cutting size of each.

Example: Sashing is 2" wide divided by 2 = 1" (finished size of each square) + $1/2$ " = $1\ 1/2$ " is the cutting size of each.

Pinwheel cornerstones: Finished width of sashing divided by 2 = finished size of each half-square triangle. Then add 1" to this measurement for the cutting size of each square used in making the half-square triangles. To trim, take the finished size of each half-square triangle and add $1/2$ " and this is the trim size.

Example: Sashing is 3" wide divided by 2 = $1\ 1/2$ " (finished size of each half-square triangle)

$1\ 1/2$ " + 1" = $2\ 1/2$ " cutting size of each square used to make the half-square triangles

$1\ 1/2$ " + $1/2$ " = 2" which is the trim to size for the half-square triangles

Sew into pinwheels

Modified Pinwheel cornerstones: Make the pinwheels following the formula above. Remember the finished size of the half-square triangles? A: $1\ 1/2$ ". Now you divide this number in half = $3/4$ ". Next, add $1/2$ " seam allowance.

Example: Half-square triangle is $1\ 1/2$ " finished divided in half = $3/4$ ".

$3/4$ " + $1/2$ " seam allowance = $1\ 1/4$ ".

Cut squares to be added to the corners $1\ 1/4$ ". Draw a line diagonally corner to corner on the wrong side of each square and then place right sides together on the pinwheel. Do not stitch directly on the line, rather, stitch one thread to the inside of the line so that when you fold the triangle over it won't be too small.
