

KIS 4" grooved ruler (right) is measured across vertically or horizontally (4 1/2" x 4 1/2") and when used in a block, the shape seems to lay on it side, either point in the corner or in the center.

KISOP 4" grooved ruler (right) is measured DIAGONALLY from corner to corner. It measures 4 1/2" x 4 1/2" from corner to corner BUT it measures 3.313" horizontally and vertically. It must be used on point (see fig.1) in a straight-set block or in the center of a square in a square unit (fig.2).
